Summary

Motivated and detail-oriented Computer Engineering student with hands-on experience in full-stack software development, software engineering, and problem-solving. Proficient in Java, Python, JavaScript, React.js, Node.js, Express.js, SQL, MongoDB, REST APIs, Git, and modern software development practices. Experienced in designing, developing, testing, and deploying scalable web applications with a focus on clean, maintainable code and user-centric solutions. Strong analytical and collaborative skills with a passion for continuous learning and building reliable, high-quality software. Seeking a Software Engineer or Full-Stack Developer role to contribute to impactful projects while growing in a fast-paced, team-oriented environment.

Skills

Programming Languages: Java, Python, SQL

Frameworks & Libraries: Spring Framework, Spring Boot, Hibernate, React.js, Bootstrap

Databases: MySQL, PostgreSQL, MongoDB

Development Tools & Platforms: Git, GitHub, VS Code, Eclipse IDE, Maven, Postman, Cursor, Antigravity

Core Computer Science: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems (OS), Computer Networks (CN), Software Development Life Cycle

Experience

Elite Software | Software Development Intern

Dec 2024 – Feb 2025

- Developed responsive web application modules using Django, HTML, CSS, and JavaScript.
- Assisted in designing and implementing frontend and backend features for web-based applications.
- Worked with Django's MVC/MVT architecture, routing, templates, and database integration.
- Collaborated on debugging, testing, and optimizing application performance.
- Gained hands-on experience with Git, project deployment, and software development best practices.

Cisco Networking Academy | Cybersecurity Virtual Intern

May 2024 – Jul 2024

- Completed hands-on training in cybersecurity, network security, threat analysis, and secure networking concepts.
- Learned vulnerability assessment, authentication, access control, and cybersecurity best practices through practical labs and assessments.

Projects

Kronos API | Academic Management System

Tech Stack: Java, Spring Boot, Hibernate, MySQL, Maven, REST APIs, JWT, Docker, Postman

- Developed a RESTful backend service for an academic management system using Spring Boot and Hibernate, following a layered architecture and REST API best practices.
- Implemented JWT-based authentication and role-based access control (RBAC) for Admin and Faculty with secure login and registration functionality.
- Designed and built CRUD APIs for managing Users, Students, Subjects, and Attendance, ensuring efficient database operations with Hibernate and MySQL.
- Tested and documented APIs using Postman and containerized the application with Docker for consistent deployment.

E-commerce Web Application

Tech Stack: React.js, JavaScript, Bootstrap, HTML5, CSS3

- Developed a responsive e-commerce web application with an intuitive user interface using React.js and Bootstrap.
- Implemented core features including product listing, product search, shopping cart management, and checkout workflow to enhance the user shopping experience.
- Built reusable React components and implemented client-side routing for seamless navigation and improved application maintainability.
- Optimized the application for responsive design, cross-browser compatibility, and improved user experience across desktop and mobile devices.

ScholarWell | Student Productivity Management Platform

Tech Stack: Node.js, Express.js, PostgreSQL, JavaScript, HTML5, CSS3

- Developed a student productivity and academic management platform to help students manage daily tasks, track sleep patterns, and monitor academic performance.
- Designed and implemented modules for task management, sleep tracking, attendance monitoring, and academic progress visualization using Node.js and PostgreSQL.
- Built responsive user interfaces with HTML5, CSS3, and JavaScript, ensuring an intuitive and user-friendly experience across devices.
- Designed a relational database schema in PostgreSQL for efficient storage and retrieval of student data, improving application performance and scalability.

Education

- Dr. DY Patil College of Engineering and Innovation, Pune (B.E. in Computer Engineering) June 2026 | CGPA: 8.3
- Deogiri College, Chhatrapati Sambhajinagar (HSC) Feb 2022 | Percentage: 76.20%
- St Mary’s High School, Gangapur (SSC) March 2020 | Percentage: 76.20%

Achievements & Certifications

- LinkedIn Learning Community: Introduction to Large Language Models
- Hugging Face: AI Agents Fundamentals
- Kiran Academy: Java Full Stack
- TNS India Foundation: Employability Training Program
- NPTEL: Programming in Java
- Udemy: CSS, Bootstrap, JavaScript And Python Stack Course
- Udemy: ReactJS
- Udemy: Git for Beginners
- Published an IJFMR research paper “Snoop: A Real-Time AI-Based Online Exam Invigilation System” (March 2026)
- Active member of AIML Club & Web 3.0 Club, Dr. D. Y. Patil College of Engineering and Innovation.
